Zscaler Client Connector Deployment and Operations Checklist

Use this checklist to mark the progress of your Zscaler Client Connector deployment.

Deployment Step	Action Taken	Recommended Best Practice Used?	Contingencies (if applicable)
Review and confirm all the operating systems to which Zscaler Client Connector is deployed.			
Review the firewall rules as per: • https://config.zscaler.us/zscalergov.net/zscaler-app • https://config.zscaler.us/zscalerten.net/zscaler-app			
Review the host anti-virus and firewall process allowlist as per Zscaler Client Connector Processes to Allowlist.			
Finalize install options for Zscaler Client Connector MSI customization.			
Follow the suggested phased rollout.
